Project TEYIA – a glass construction software

Task KL®megla is a leading manufacturer of fittings like hinges and clamps for glass construction. KL®megla faces the problem that glaziers do not select fittings on a per project basis, as they fear difficulties with different fittings. Hence a software tool should be build that enables glaziers to plan, build and manage their glass constructions. TEYIA was planned as a combination of a design tool with ERP and payment functionalities. TEYIA was to be built in a new startup company. The product reached the conceptual phase.

Responsibilities Team lead, product management, Scrum product owner, strategic planning, requirements engineering, human resources, business planning, wireframes, user experience design, information architecture

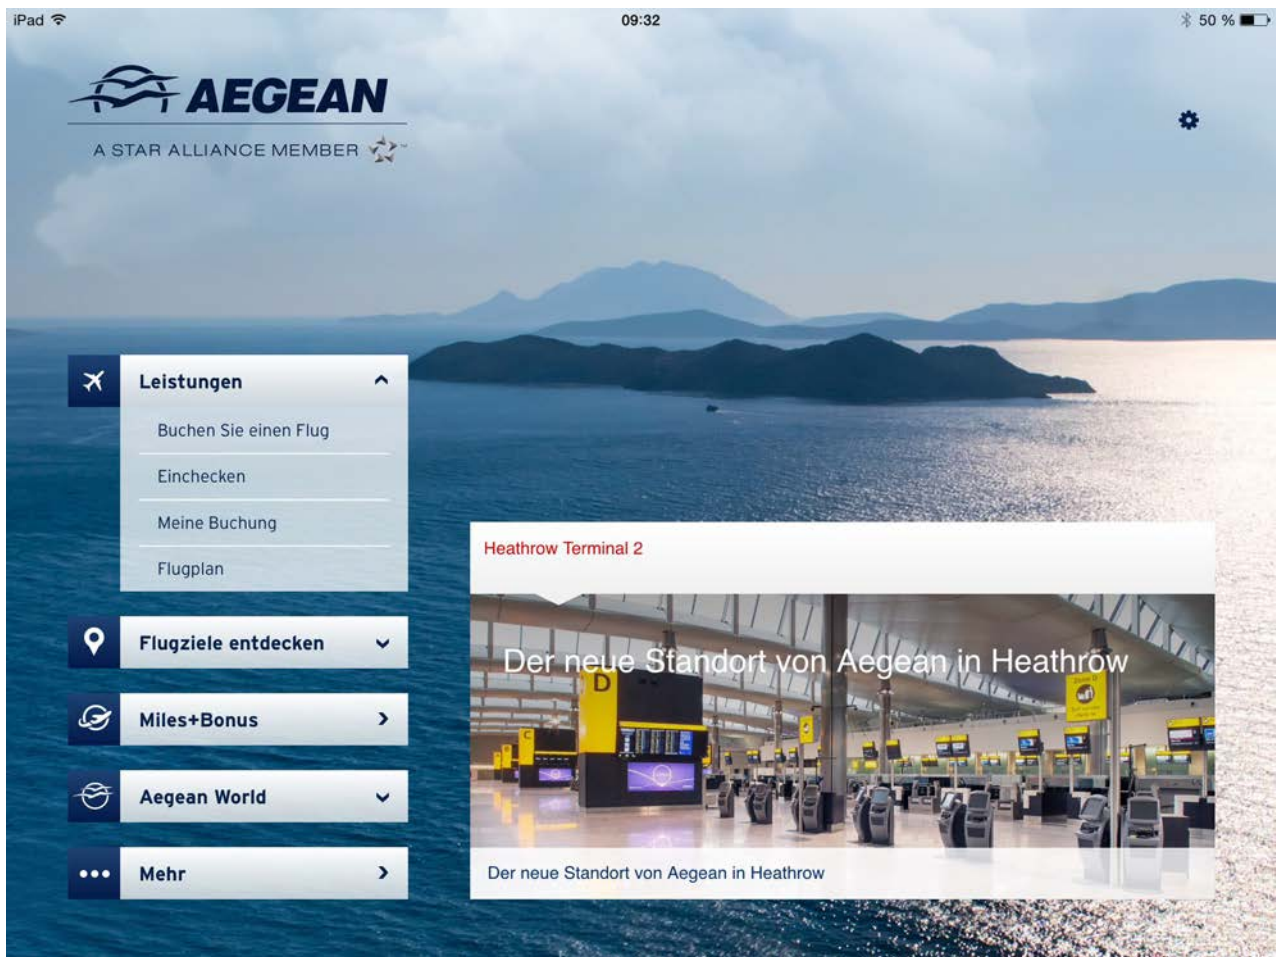

Project REWE Supermarket – iPhone and Android App

Task REWE Supermarket is one of the large German grocery stores. The apps offer localized and personalized information about REWE branches as well as offers, recipes and a personal shopping list.

Responsibilities Strategic planning, wireframes, user experience design, information architecture
